BRAD HEALY

‘Detached’ is an exploration of isolation and seclusion which celebrates the beauty of solitude in its most tangible form, allowing visitors to appreciate the transformative power of isolated and imaginative spaces.

The focus on realism grounds the artworks in somewhat recognisable scenes inviting visitors to connect with the familiar. Using a consistent softer colour palette throughout brings an easiness and warmth to the isolated spaces. Visitors are invited to explore the depths of their imagination and the beauty found in the familiar and not so familiar. ‘Detached’ becomes a transformative journey urging contemplation of the profound connections between the surreal and the real in our perceptions of the world.

As a 3D artist, motion designer, and art director, Brad Healy has had the opportunity to collaborate with iconic brands such as Lenovo, Intel, and New Balance. His work has been showcased internationally and in local exhibitions, allowing him to share his passion for art with a wider audience.

Through the combination of creativity and technology, Brad brings captivating visual experiences to life. With a focus on continuous learning and growth, he aims to inspire others and leave a positive impact. He is continually grateful to contribute to the ever-evolving world of art.

1

EUPHORIA OF SOLACE, 2023

Digital print
59.4 x 84.1 cm (A1 portrait)

\$250.00
